Program Content:

All participants will complete a DiSC behavioral profile, and this will be used as a foundational component throughout the program. Sessions and content will vary over the nine months; but they will contain similar components:

- **Reflection and Check-in:** Participants break into small groups and discuss their utilization of knowledge and skills acquired through Leadership Summit. This provides opportunities to discuss real-life situations, gather feedback from peers, and create action plans for next steps.
- **Guest Trainers:** Leadership experts from different organizations and locations will facilitate content focused on contemporary leadership topics including Values-based Leadership, Conscious Leadership, Change Management, Situational Leadership, Building Effective Teams, etc. These sessions are interactive and activity based.
- **Topical Panels:** 3-4 local leaders join a panel to discuss critical issues in our community including Public Safety, Healthcare, Economic Development, Housing, Education, etc. *Typically 7 out of 9 sessions have Topical Panels*

Testimonials:

“The Leadership Summit class takes a unique approach to developing the skills of professionals in our community and strengthening partnerships county-wide. By combining leadership techniques with topical panels, participants leave with a well-rounded knowledge base on a variety of key issues.” Tara Dew, Program Manager for the Summit Foundation

“People often end up in leadership roles by being good workers, but they never receive training on how to be a leader. The Leadership Summit gives people the tools to move beyond managing to accomplish tasks, and gives them the skills to motivate others to accomplish a greater mission.” *CB Bechtel Executive Director Team Summit Colorado*
