

This course requires students to stay overnight—for example, sleeping in a community space in one of Colorado’s huts, sharing a cabin with other students and instructors, sleeping in a snow shelter, hotel stay, etc. As part of CMC’s [Crush COVID Commitments](#) and to align with CMC’s Residence Hall COVID Requirements, please note that a COVID vaccination will be required for participating in this course. In this case, full vaccination status will need to be obtained prior to the start of this course and proof of vaccination will need to be provided to a CMC enrollment services coordinator. Exemptions are available for students with medical conditions or personal beliefs, but please note that an exemption does not alter the expectations for the course or trip.

If you need special accommodations, these should be arranged through our ADA processes and may impact the nature of your participation.

Contact your campus enrollment services coordinator or counselor/academic advisor for more information, questions regarding this requirement, or to obtain an exemption form.

Please sign below indicating you have read and understand this notification. You will then be able to register for this class.
